

Air Cylinder

ø20, ø25, ø32, ø40

RoHS

Cylinder with rod end bracket is standardized.

Interchangeable in mounting with the existing model

New

- A double rod type and a single acting type have been added.

- A non-rotating rod type has been added.

- A direct mount type has been added.

- Made-to-order options have been added:

Special port location (-XC3), Made of stainless steel (-XC6), Dust resistant cylinder (-XC4), Heat-resistant cylinder (-XB6), etc.

CM2 Series

CAT.ES20-269B

Various mounting bracket options

- Mounting brackets suitable for various installation conditions
- Improved mounting flexibility

Mounting brackets, accessories, and nut material: Stainless steel

The following accessories are available. (Please order separately.)
Refer to the "Accessories" page of each series for details.

Part numbers for products with a rod end bracket and/or a pivot bracket available

It is not necessary to order a bracket for the applicable cylinder separately.

* Mounting brackets are shipped together with the product but do not come assembled.

Easy fine adjustment of auto switch position

Fine adjustment of the auto switch set position can be performed by loosening the auto switch attached screw without loosening the auto switch mounting band. Operability improved compared with the existing auto switch set position adjustment, where the complete switch mounting band requires loosening

Overall length is shortened with boss-cut type.

Boss for the head cover bracket is eliminated and the overall length of cylinder is shortened.

Mounting

- Boss-cut/Basic (BZ)
- Boss-cut/Rod flange (FZ)
- Boss-cut/Rod trunnion (UZ)

Specifications, performance, and mounting method are the same as those of the existing model.

Proposals for Improving Product Life

SMC offers a wide range of models suitable for various applications and operating environments.

This includes models that can be used in environments that the basic model cannot, such as those where coolant liquid, water droplets/splashing, dust, etc., are present. When using in environments where the above are present, it is possible to improve the service life of the product by selecting a model ideal for use in such environments.

➡ For details, refer to the **Web Catalog**.

- Environmentally resistant specifications
- Measures against moisture/drainage
- Measures against condensation
- Preventive and predictive maintenance
- High rigidity

*1 Intermediate strokes not listed above are produced upon receipt of order. The manufacturing of intermediate strokes in 1 mm increments is possible. (Spacers are not used.)

*2 Using a stroke of a length which is smaller than the effective cushion length may result in reduced air cushion performance. Refer to "Technical Data 1" in the **Web Catalog** for details on the effective cushion length.

*3 The value in brackets indicates the max. stroke of the cylinder with a rod boot.

* Applicable strokes should be confirmed according to the usage. For details, refer to the "Air Cylinders Model Selection" in the **Web Catalog**. In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to deflection, etc.

* The min. stroke of the type with a magnet varies depending on the switch. For details, refer to pages 62 and 66.

Option: Ordering Example of Cylinder Assembly

Cylinder model: CDM2C20-50Z1-NV-M9BW

Mounting C: Single clevis
Pivot bracket N: Yes
Rod end bracket V: Single knuckle joint
Auto switch D-M9BW: 2 pcs.

* Pivot bracket, single knuckle joint and auto switch are shipped together with the product but do not come assembled.

* Pivot bracket is only available for C, T, U, E, V, and UZ mounting types.

* No bracket is provided for the female rod end.

*1 Intermediate strokes not listed above are produced upon receipt of order. The manufacturing of intermediate strokes in 1 mm increments is possible. (Spacers are not used.)

*2 Using a stroke of a length which is smaller than the effective cushion length may result in reduced air cushion performance. Refer to "Technical Data 1" in the Web Catalog for details on the effective cushion length.

*3 The value in brackets indicates the max. stroke of the cylinder with a rod boot.

* Applicable strokes should be confirmed according to the usage. For details, refer to the "Air Cylinders Model Selection" in the Web Catalog. In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to deflection, etc.

* The min. stroke of the type with a magnet varies depending on the switch. For details, refer to pages 62 and 66.

Accessories

* Refer to pages 20 to 23 for accessories, since it is the same as standard type, double acting, single rod.

* Stainless steel mounting brackets and accessories are also available. Refer to page 22 for details.

CM2K Series

A cylinder which rod does not rotate because of the hexagonal rod shape.

Non-rotating accuracy

ø20, ø25 —±0.7°*1

ø32, ø40 —±0.5°*1

Can operate without lubrication.

The same installation dimensions as the standard cylinder.

Auto switches can also be mounted.

It can be installed with auto switches to simplify the detection of the stroke position of the cylinder.

*1 The hexagonal rod face position is not guaranteed.

*1 Intermediate strokes not listed above are produced upon receipt of order. The manufacturing of intermediate strokes in 1 mm increments is possible. (Spacers are not used.)

*2 Using a stroke of a length which is smaller than the effective cushion length may result in reduced air cushion performance. Refer to "Technical Data 1" in the **Web Catalog** for details on the effective cushion length.

* Applicable strokes should be confirmed according to the usage. For details, refer to the "Air Cylinders Model Selection" in the **Web Catalog**. In addition, the products that exceed the standard stroke might not be able to fulfill the specifications due to deflection, etc.

* The min. stroke of the type with a magnet varies depending on the switch. For details, refer to pages 62 and 66.

* When a female thread is used, use a thin wrench when tightening the piston rod.

* When a female thread is used, depending on the material of the workpiece, use a washer etc., to prevent the contact part at the rod end from being deformed.

Dimensions of Each Mounting Bracket

The dimensions are the same as standard type, double acting, single rod, except the configuration of the piston rod. Refer to pages 11 to 18. Specifications for the auto switch equipped type are the same as the CDM2 series standard type.

CM2KW Series

A cylinder which rod does not rotate because of the hexagonal rod shape.

Non-rotating accuracy

ø20, ø25 —±0.7°*1

ø32, ø40 —±0.5°*1

Can operate without lubrication.

The same installation dimensions as the standard cylinder.

Auto switches can also be mounted.

It can be installed with auto switches to simplify the detection of the stroke position of the cylinder.

*1 The hexagonal rod face position is not guaranteed.

Made to Order

CM2R Series

The CM2R direct mount cylinder can be installed directly through the use of a square rod cover.

Space saving has been realized.

Because it is a directly mounted type without using brackets, its overall length is shorter, and its installation pitch can be made smaller. Thus, the space that is required for installation has been dramatically reduced.

Improved installation accuracy and strength

A centering boss has been provided to improve the installation accuracy. Also, because it is the directly mounted type, the strength has been increased.

Two types of installation

Two types of installations are available and can be selected according to the purpose: the front mounting type or the bottom mounting type.

*1 The switching bracket (made of polyamide) is not to be used in environments where it could be exposed to chemicals (In particular, alcohol, chloroform, methylamine, hydrochloric acid, and sulphuric acid, etc.), as they may affect the performance.

*2 When mounting a D-M9□A(V) type auto switch, if the switch bracket is mounted on the indicator light, it may damage the auto switch. Therefore, be sure to avoid mounting the switch bracket on the indicator light.

Symbol
-XB6

The seal material and grease used in this air cylinder have been changed so that it can be used at temperatures between −10 up to 150°C.

Applicable Series

Series	Description	Model	Action	Note
CM2	Air cylinder	CM2-Z1	Double acting, Single rod	Excludes models with a rod boot or auto switch

How to Order

- * Operate without lubrication from a pneumatic system lubricator.
- * In principle, it is impossible to make a heat-resistant cylinder with a built-in magnet or with an auto switch.
- * Piston speed ranges from 50 to 500 mm/s.

Seal material	Fluororubber
Grease	Heat-resistant grease
Specifications other than the above and dimensions	Same as those of the standard type

Warning Precautions

Be aware that smoking cigarettes, etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

2 Cold-resistant Cylinder (−40 to 70°C)

Symbol
-XB7

The seal material and grease used in this air cylinder have been changed so that it can be used even at lower temperature down to −40°C.

Applicable Series

Series	Description	Model	Action	Note
CM2	Air cylinder	CM2-Z1	Double acting, Single rod	Excludes models with a rod boot, air cushion, or auto switch
		CM2W-Z1	Double acting, Double rod	Excludes models with a rod boot, air cushion, or auto switch
	Direct mount type	CM2R-Z1	Double acting, Single rod	Excludes models with an air cushion or auto switch

How to Order

- * Operate without lubrication from a pneumatic system lubricator.
- * Use dry air which is suitable for heatless air dryer, etc., not to cause the moisture to be frozen.
- * Manufacturing built-in magnet type and mounting an auto switch are impossible.
- * Piston speed ranges from 50 to 500 mm/s.

5 Dust Resistant Cylinder

Symbol
-XC4□

Up to 6 times more durable in dusty environments

Applicable powder particle size: 20 to 100 μm
Suitable for environments with ceramic powder, toner powder, paper powder, and metallic powder
* Excludes weld spatter

Air Cylinder CM2-XC4□

High Durability Series

High Durability Series is the series name for the "special specification" that offers superior durability and environmental resistance compared to standard products.

Can be selected according to the application

A Lube-retainer (stable lubrication function) and a heavy-duty scraper can be mounted on the piston rod.

Specifications	Applicable powder particle size	Structure	Durability
With 2 Lube-retainers XC4A	20 to 50 μm		
With heavy-duty scraper + Lube-retainer XC4B	30 to 100 μm		
With heavy-duty scraper XC4C	50 to 100 μm

Auto switch	Mountable
Dimensions	Same as those of the standard type
Specifications other than the above	Same as those of the standard type

Warning Precautions

Be aware that smoking cigarettes, etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

<Not installable>

Food zone.....An environment where food which will be sold as merchandize, directly touches the cylinder's components

Splash zone.....An environment where food which will not be sold as merchandize, directly touches the cylinder's components

<Installable>

Non-food zone.....An environment where there is no contact with food

- * Avoid using this product in the food zone. (Refer to the figure above.)
- * When the product is used in an area of liquid splash, or a water resistant function is required for the product.
- * Operate without lubrication from a pneumatic system lubricator.
- * Use the following grease pack for the maintenance work.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

⚠ Danger : **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

⚠ Warning: **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Caution: **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. SMC products cannot be used beyond their specifications. They are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not allowed.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, combustion equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

Caution

SMC develops, designs, and manufactures products to be used for automatic control equipment, and provides them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not allowed.

Products SMC manufactures and sells cannot be used for the purpose of transactions or certification specified in the Measurement Act of each country. The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) **Suction cups (Vacuum pads) are excluded from this 1 year warranty.**

A suction cup (vacuum pad) is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the suction cup (vacuum pad) or failure due to the deterioration of rubber material are not allowed by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Revision History

Edition B * Standard type products (double rod type and single acting type) have been added.
* A non-rotating rod type has been added.
* A direct mount type has been added.
* Made-to-order options have been added:
- Heat-resistant cylinder (-XB6), Special port location (-XC3),
Made of stainless steel (-XC6□), Dust resistant cylinder (-XC4□), etc.
* The number of pages has been increased from 32 to 76.

Safety Instructions

Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
